Summary

I am a results-driven Web Scraping Developer with a solid background in Python and hands-on experience in tools like Scrapy and BeautifulSoup. My freelance work includes developing an e-commerce platform and delivering data-driven insights for startups.

Experience

Freelancer | Delhi, Delhi-NCT

Web Scraper | 01/2021 - Present

- Utilized Python and Selenium for data extraction and analysis
- Implemented web scraping techniques to gather relevant information
- Developed strategies to handle dynamic content and anti-crawling measures
- Collaborated with the team to provide insights for strategic decision-making
- Contributed to making a meaningful impact on the startup's growth
- Demonstrated expertise in overcoming challenges in data extraction and analysis

Freelancer | Delhi, Delhi-NCT

Web Developer | 10/2024 - 11/2024

- Developed an e-commerce platform called **ZaishAngadi** for a clothing enterprise, providing website creation, data provisioning, and analytical insights.

GrabOnRent | Bengaluru, Kamataka

Internship Student | 07/2018 - 10/2018

- Completed more than three-month internship at GrabOnRent, an online rental marketplace startup in Bengaluru, gaining valuable industry exposure.

Skills

Python, R, MySQL, MongoDB, ASP.NET, Django, Flask, Playwright, Selenium, Scrapy, BeautifulSoup, Selectolax, Git

Education

SAITM, MDU-Rohtak | Farukhnagar, Haryana

Bachelor of Technology (CSE) | 08/2020

Kamal Model Sr. Sec. School | Delhi, Delhi-NCT

Higher Secondary Certificate

Projects

[Periodic Table Web Scraper](#)

- Utilized **Scrapy** and **Scrapy-Playwright** to dynamically scrape data about periodic table elements.
- Extracted details including symbol, name, atomic number, atomic mass, and chemical group.

[Ajax-Based Web Scraper](#)

- Developed a **Selenium**-based scraper to extract job postings from the Trafigura Careers site.
- Extracted job titles and locations, handling AJAX-based content, and exported the data to a CSV file.

[ASP.NET Web-Page Scraper](#)

- Built a Python-based scraper using **httpx** and **selectolax** to extract quotes, authors, and tags from an ASP.NET (.aspx) website.
- Managed challenges related to viewstate and saved the extracted data in **JSON** format.
