Experience

Freelancer

Jan 2021 - Present

- Utilized Python and Selenium for data extraction and analysis.
- Implemented web scraping techniques to gather relevant information.
- Developed strategies to handle dynamic content and anti-crawling measures.
- Demonstrated expertise in overcoming challenges in data extraction and analysis.

Freelancer

Oct 2024 - Nov 2024

- Developed a website for ethnic wears e-store called **ZaishAngadi**, providing website creation, data provisioning and analytical insights.

Freelancer

Thrott1

Apr 2024 - May 2024

- Contracted by startup Thrott1 to design and implement large-scale web scraping pipelines, capturing data on thousands of automobile parts spanning diverse categories.
- Used Python, BeautifulSoup and frameworks like Scrapy for pipelines.

Summer Intern

GrabOnRent

July 2018 - Oct 2018

- Completed more than three-month internship at GrabOnRent, an online rental marketplace startup in Bengaluru, gaining valuable industry exposure.
- Contributed to diverse projects, including developing business intelligence dashboards and building web scraping solutions to extract and analyze data from rental e-commerce platforms.

Education

B.Tech in Computer Science

Aug 2016 - July 2020

Skills

Programming Languages: 🐍 Python, 📄 HTML / 🎨 CSS, 🗄 MySQL, 📊 R

Tools and Frameworks: Git, PyTorch, Keras, Numpy, Scikit-learn, MongoDB, GCP, FastAPI, Flask, ASP.NET, Playwright, Scrapy, Selenium, Selectolax

Languages: English (proficient), Hindi (native)

Projects

P1 Periodic Table Web Scraper

- Utilized **Scrapy and Scrapy-Playwright** to dynamically scrape data about periodic table elements.
- Extracted details including symbol, name, atomic number, atomic mass, and chemical group.

P2 Ajax-Based Web Scraper

- Developed a **Selenium**-based scraper to extract job postings from the Trafigura Careers site.
- Extracted job titles and locations, handling AJAX-based content, and exported the data to a CSV file.

P3 ASP.NET Web-Page Scraper

- Built a Python-based scraper using httpx and selectolax to extract quotes, authors, and tags from an ASP.NET (.aspx) website.
- Managed challenges related to viewstate and saved the extracted data in **JSON** format.
