Summary

Python Developer with hands-on experience in building and scaling web scraping pipelines and backend data systems. Proficient in Python, Playwright, Scrapy, PostgreSQL with a strong understanding of HTML, CSS, and JavaScript for scraping dynamic web applications. Experienced in delivering high-quality, analytics-ready datasets and collaborating with cross-functional teams to support data-driven business decisions.

Experience

Web Scraping Developer Thrott1 Apr 2024 - July 2025

- Designed, developed, and maintained large-scale web scraping pipelines in Python to collect and process data for 10,000+ automobile parts across multiple supplier and marketplace platforms.
- Built robust scrapers using Scrapy, BeautifulSoup, and Playwright to handle both static and JavaScript-rendered content, ensuring high data accuracy and coverage.
- Engineered structured data workflows with PostgreSQL (and MongoDB where appropriate), including schema design, indexing, and optimized queries for fast retrieval and analytics readiness.
- Integrated scraped data into internal portals and APIs, contributing backend logic in Python/Django to support downstream consumption.
- Utilized strong understanding of HTML, CSS, and JavaScript to accurately identify DOM structures, debug rendering issues, and maintain scrapers as frontend layouts evolved.
- Implemented scraper resilience features such as retry mechanisms, request throttling, proxy rotation, and user-agent management to minimize blocking and downtime.

Web Designer ZaishAngadi Jan 2024 - March 2024

- Designed and launched an e-commerce website for ethnic wear e-store using Wix.
- Optimized product listing and integrated analytics for user engagement tracking.
- Collaborated with the analytics team to ensure high-quality data for business insights.
- Customized website layouts, themes, and components to align with the brands visual identity and improve overall user experience.

Python Freelancer Jan 2021 - Present

- Built and deployed automated web scraping tools using Python, Selenium, and BeautifulSoup.
- Developed scalable scraping scripts to collect structured data from dynamic websites with anti-bot protection.
- Delivered custom data analytics dashboards and visualizations for clients.

Summer Intern GrabOnRent July 2018 - Oct 2018

- Completed more than three-month internship at GrabOnRent, an online rental marketplace startup in Bengaluru, gaining valuable industry exposure
- Created scraping utilities to extract rental data from competitor websites, improving market insights.

Education

B.Tech in Computer Science, SAIMT, MDU-Rohtak	Aug 2016 - July 2020
CBSE-AISSCE (12th),Kamal Model School,South West Delhi	May 2013
CBSE-AISSE (10th),Kamal Model School,South West Delhi	May 2011

Skills

Languages: Python, HTML, CSS, MySQL, R, PostgreSQL

Frameworks & Tools: Scrapy, Selenium, Playwright, BeautifulSoup, Flask, FastAPI, Git, MongoDB, PyTorch, Keras, Numpy, Scikit-learn, GCP.

Others: Web Scraping, Data Analysis, REST APIs, GCP

Projects

P1 Periodic Table Web Scraper

- Used Scrapy and Playwright to scrape and structure periodic table element data (atomic number, mass, etc.).
- Built data pipelines for dynamic content with automatic retries and data validation.

P2 Ajax-Based Web Scraper

- Developed a Selenium-based scraper for Trafigura Careers site to collect job listings.
- Implemented AJAX handling and exported results to CSV for HR analytics.

P3 ASP.NET Web-Page Scraper

- Built a Python-based scraper using httpx and selectolax to extract data from ASP.NET pages with viewstate.
- Optimized parsing performance and saved extracted data in JSON.

Certifications

Web Scraping (Udemy)

Data Science (Udemy)
